

Connecting MySQL Server on VSCode

This guide will walk you through the process of connecting a MySQL server using Visual Studio Code (VSCode). The steps include installing the necessary VSCode extension and configuring the MySQL server connection.

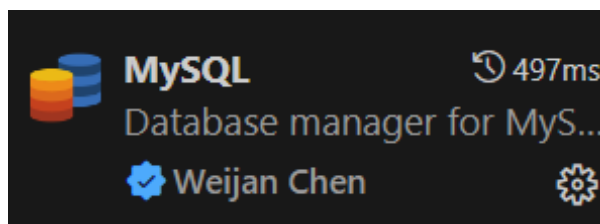

Step 1: Install MySQL Extension in VSCode

1. Open VSCode:

- Launch Visual Studio Code on your machine.

2. Install MySQL Extension:

- Click on the Extensions icon in the Activity Bar on the side of the window or press `Ctrl+Shift+X` to open the Extensions view.
- In the search bar, type `MySQL` and look for the `MySQL` extension by Weijan Chen (shown in the image below).
- Click `Install` to add the extension to your VSCode.

Step 2: Configure MySQL Server in VSCode

1. Open MySQL Extension:

- After installation, you will see a new icon for the MySQL extension in the Activity Bar. Click on it to open the extension.
