

Exploratory Data Analysis Notebook

Welcome to the Exploratory Data Analysis (EDA) exercise! In this lesson, you will learn how to analyze and visualize data using Python in a Google Colab notebook. Click on the link below to access the interactive Colab notebook where you will perform various EDA techniques:

[Start the EDA Exercise](#)

By completing this exercise, you will gain hands-on experience in:

- Importing and cleaning data
- Performing descriptive statistics
- Visualizing data with plots and charts
- Identifying patterns and trends in the data
